AUTOL SPEZIAL SÄGEKETTENHAFTÖL

AUTOL SPEZIAL SÄGEKETTENHAFTÖL is a saw chain adhesive oil that can be used all year round with CO₂-saving mineral base oil and effective zinc- and ash-free additives for use in all motor chainsaws.

Characteristics (typical figures):

Viscosity	at 40°C	mm ² /s	96,5
	at 100°C	mm ² /s	14,9
Viscosity index		/	160
Density at 15°C		kg/m ³	850
Flash point o. C.		°C	230
Pourpoint		°C	-33

Applications:

AUTOL SPEZIAL SÄGEKETTENHAFTÖL is best suitable for the summer and winter application also under most severe conditions. Due to the special formulation a sparingly consumption with best lubrication is achieved.

The development and testing of the product had been in accordance with the guidelines of KWF for the performance capability test of environmentally friendly chain lubricants.

A fast soaking of the chain is necessary without the oil being thrown off to ensure a good cooling and lubricating of sword and chain also under difficult working conditions. This is realised due to the good flowability of the product and the special adhesive properties.
