

# Agip Racing 10W-60

**Agip Racing 10W-60** is a fully synthetic engine oil of the newest generation, especially for high-performance gasoline engines in sports use respectively other highest engine loads.

## **Characteristics (typical figures):**

Agip Racing	Unit	10W-60	
Viscosity at 100°C	mm²/s	24	
Viscosity at 40°C	mm²/s	160	
Viscosity index		177	
Flashpoint	°C	225	
Pourpoint	°C	-33	
Density at 15°C	kg/m³	856	

#### **Properties and Performance:**

- The synthetic base oils form a stable high-performance lubrication film that also guarantees a safe lubrication when the engine had been shut down for some time. This film ensures an easy start and reduces the cold start wear also under very difficult condition.
- The thermally stable synthetic base oil has an extremely low evaporation tendency and therefore causes the lowest oil conditioned oil consumption.
- The excellently tested shear stability is a guarantee for the viscosity stability (stay-ingrade) of the engine oil also after longer application under extreme conditions.
- The well-balanced special formulation ensures highest performance regarding the detergent/dispersing properties, the corrosion protection, foam prevention, oxidation stability and wear protection properties.

### Applications:

**Agip Racing 10W-60** is especially recommended by Alfa Romeo for the application in the Alfa 166 Version 2.0 T.Spark, in the GTA and JTS engines.

#### **Specifications:**

**Agip Racing 10W-60** is approved by name respectively meets the requirements\* of the following specifications:

API SL (CCMC G 5, PD 2) BMW M GmbH\* Alfa Romeo\*
