

Eni Antifoam CAS

Antifoam CAS is a silicon free defoamer for water mixed cooling lubricants based on organic calcium compounds.

Characteristics (typical figures):

ANTIFOAM CAS	Unit		Test method
Appearance		Colourless	
Density at 20°C	kg/m ³	1150	DIN 51 757
Viscosity at 20°C	mm ² /s	1,3	DIN 51 562
pH value (10%)		6,8 ± 0,2	

Properties and Performance:

- silicon oil free defoamer
- increase of the total hardness
- optimum defoaming effect
- part of the addition is discharged with the skimmed oil

Applications:

Antifoam CAS is used as defoamer for water mixed cooling lubricants. 1 litre for 1000 litres water make an increase of 10°dH

Recommended application concentration: 0,05 – 0,1 %
based on the cooling lubricant circulation volume

Storage: 5 to + 40°C
