

Eni Antifreeze Bike S

Eni Antifreeze Bike S is an amine, phosphate and nitrite free engine coolant based on ethylene glycol ready to use for filling of scooters and motorbikes cooling systems. It contains a corrosion inhibitor package based on salts of organic acids (OAT) that delivers durable performances for prolonged change intervals.

Characteristics (typical value):

Eni Antifreeze Bike S	Unit	
Colour	-	pink
Boiling point	°C	110
Freezing point	°C	-40
pH	-	8,2
Density at 20°C	kg/m ³	1071

Properties and Performance:

- **Eni Antifreeze Bike S** meets the requirements of motorcycle applications and is one of the most modern radiator protection product on the market.
- It has a long-term protection against corrosion for all materials used in the engine and radiator construction, such as cast iron, aluminium, copper and solder alloys as well as a good compatibility with hoses, seals or plastics.
- It contains carefully selected amine, nitrite and phosphate free inhibitors and is therefore environmentally friendly.

Specifications:

Eni Antifreeze Bike S meets the specification requirements of the following organisations:

- CUNA NC 956-16 (ed. '12)
- ASTM D 3306
