

Special lubricants

AUTOL Multispray M 2000 MIT MoS 2

Special lubricating spray for various applications in industry, automobile and hobby fields.

Characteristics (typical figures):

Density at 20°C	kg/m ³	682
Flash point o. C.	°C	240

AUTOL MULTI-SPRAY M 2000 MIT MoS 2 is a multifunctional product that functions as a rust penetrator, lubricant, creeping oil and short term anti-corrosion agent.

Its components ensure excellent creep properties, rust penetration, adhesiveness to surfaces and the formation of a sliding layer. The stable lubricant MoS₂ helps to improve movement of small fittings or connections with heavy loads.

The product is available in aerosol spray cans so that pneumatic systems are not necessary. Also the handling is herewith simplified. For a complete emptying of the solid lubricant the spray can should be shaken well before every application.

Applications:

AUTOL MULTI-SPRAY M 2000 mit MoS 2 can be used for assembly and maintenance of automobiles, constructional and industrial equipment as well as in the hobby field.

Please observe the manufacturer's specifications when selecting products!
