### AUTOL BIOKETTOL

“

**Fast biodegradable chain saw medium** based on vegetable oil.

#### Characteristics (typical figures):

Viscosity	at 40°C	mm <sup>2</sup> /s	85
	at 100°C	mm <sup>2</sup> /s	14,2
Density at 15°C		kg/m <sup>3</sup>	920
Flash point o. C.		°C	> 230
Pourpoint		°C	-22

**AUTOL BIOKETTOL** is a chain saw adhesive oil based on vegetable base oils that is formulated with a fast biodegradable additive system and has good application properties.

It has excellent lubricating properties due to its special viscosity and combined vegetable adhesive additives. This means minimised chain wear and lower blade temperatures. Due to the excellent adhesive properties the oil consumption can be clearly reduced for saws with dosing pumps.

#### Applications:

**AUTOL BIOKETTOL** is suitable for summer and winter application even under severest conditions. Due to its special formulation it can be economically used yet it still provides good lubrication.

When the motor saw is not in use the cutting fittings and oil pump should be cleaned.

Please observe the manufacturer's specifications when selecting products.
