

## Active agent

### AUTOL HEL PREMIUMWIRKSTOFF

Combustion improver

Modern high-performance active agent for the production of premium heating oil.

#### Characteristics (typical figures):

Viscosity at 20°C	mPa.s	10
Density at 20°C	kg/l	0,838
Flashpoint	°C	61
Water hazardous class		WGK II
Mixing ratio		1 : 2000
		1 litre agent on 2.000 litres heating oil

#### Properties and Performance of AUTOL HEL Premiumwirkstoff:

AUTOL HEL Premiumwirkstoff is a high efficiency combustion stabiliser with scent.

Its properties are

- reduces the operational costs
- improved ageing stability
- prevents formation of sediments and fouling
- efficient with the typical heating oil qualities
- no deposits due to ash-free active agents
- counteracts burner problems and filter blockings
- contains own scent against the awkward heating oil odour
- universal application for yellow, blue and rocket burners

AUTOL HEL Premiumwirkstoff is applicable for all burner types (vaporising, blue, yellow and rocket burner), which are operated with standard heating oil, low sulphur respectively sulphur free heating oil or heating oil with bio components.

Please observe the manufacturer's specifications when selecting products.
