AUTOL Meißelpaste

MF 2 U-20

Tried and tested chisel paste based on aluminium complex soap.

Characteristics (typical figures):

Soap base		Al-Complex
NLGI grade		2
Application temperature range	°C	-20 to +1100
Drop point	°C	ca. 250
Base oil viscosity at 40°C	mm ² /s	350
Behaviour against water		0-90

AUTOL Meißelpaste is a brown-black aluminium complex soap paste with metal powder and solid lubricant additives. Due to its special composition this high-quality product has the following properties:

- squeeze-stable
- good water resistance
- high thermal loadability
- good corrosion protection
- stable against oxidation
- emergency running properties due to a solid lubricant film up to approx. 1100°C

Applications:

AUTOL Meißelpaste is suitable for the lubrication of insertion tools and wear bushes of hydraulic and compressed air hammers which are used for surface construction, underground engineering and road construction.

ATTENTION! AUTOL Meißelpaste is no lubricating grease and therefore not allowed to be used for the lubrication of roller and sliding bearings.

Please observe the manufacturer's specifications when selecting products.
