

Eni Brake Fluid DOT 4 Plus

Eni Brake Fluid DOT 4 Plus is a synthetic high-performance fluid, which is applicable for highly loaded break systems, such as sports and racing cars, etc.

Characteristics (typical figures):

Eni Brake Fluid DOT 4 Plus		Unit	
Viscosity	at -40°C	mm ² /s	1400
Boiling point ERBP		°C	260
Wet boiling point Wet-ERBP		°C	180
Density at 20°C		kg/l	1,07

Properties and Performance:

- Due to its excellent Boiling point **Eni Brake Fluid DOT 4 Plus** gives highest safety, also when the affected parts are exposed to very high temperatures.
- In case of contamination with humidity, also at higher water concentrations, which could cause vapour lock in the braking system, the Boiling point is in a safe range.
- It has a low freezing point and keeps its prescribed Viscosity also at low outside temperatures.
- It is not corrosive to metals which are used in brake circulations, has good lubrication and wear protection properties and is compatible with rubber components.

Specifications:

Eni Brake Fluid DOT 4 Plus meets the requirements of following specifications:

- SAE J 1703 / SAE J 1704
- FMVSS 116 DOT 3
- FMVSS 116 DOT 4
- ISO 4925 Class 4

Warning:

Contamination with dirt, water, petroleum products or other substances causes brake failures. Keep containers clean and tightly sealed to avoid the ingress of moisture.
