

Eni Calibration Fluid Steuerfrei

Eni Calibration Fluid Steuerfrei is a special product developed for calibrating and testing diesel fuel injectors.

Physikalische Eigenschaften (typische Werte):

Eni Calibration Fluid Steuerfrei	Unit	
Colour		L 1
Viscosity at 40°C	mm ² /s	2,5
Density at 15°C	kg/m ³	825
Flashpoint P.M	°C	90
Pourpoint	°C	-30
Rust protection (salt water)		pass

Properties and Performances:

Eni Calibration Fluid Steuerfrei is formulated with a special base oil with antioxidant, anti-foam, anti-rust additives.

Eni Calibration Fluid Steuerfrei is a very chemical and thermal stable product and is characterized by a strictly defined and constant viscosity to guarantee accurate calibrations, ensuring also an excellent corrosion protection.

Applications:

Eni Calibration Fluid Steuerfrei is a special product developed for calibrating and testing diesel fuel injectors and is also suitable for:

- the protection of diesel fuel injectors during downtime;
- the lubrication of high-speed spindles in machine tools

Specifications:

- ISO 4113-2010
- SAE J967-2002
- ISO-L-FC
